

40FT SHIPPING CONTAINER HIGH CUBE

Information about this container is also available on our website:

<https://www.alconet-containers.com/container/40ft-shipping-container-high-cube/>

A 40ft shipping container High Cube is one of the most popular and worldwide used containers for efficient transport of goods over sea. This shipping container can easily be transferred onto shipping vessels and trucks. The standard shipping container is also called storage container or dry van container because its main purpose includes, but is not limited to, storage and transport of goods.

The High Cube container, often shortened to HC, is approximately 30 centimeters (11,8 inch) higher than the regular shipping container. This makes the 40ft shipping container HC exceptionally suitable for storage and transport purposes. Moreover, these containers can be modified to fit your specific needs. It is for example possible to instal windows, doors or shutters or set up lighting or other electronics.

Are you interested in leasing, renting or buying shipping containers? We offer you the opportunity to directly request a quote online. We are able to deliver the containers to your designated location. Please indicate this in your application so that we can give you a suitable price indication.
